

Bugis-Theme Changelog

Version 1.0.4 - October 14th 2011

1. Added outline:none; style.css reset (to remove dotted line on focus in Firefox).
 2. Updated jQuery to new version 1.6.4 (see functions.php line 37).
 3. Call html5 enabling script from googles online version (header.php line 47).
 4. Included WP Pagenavi plugin code mit if abfragen(in archive.php, author.php, category.php, tag.php, index.php and search.php). Now no additional code is needed after activation the WP Pagenavi plugin.
 5. Added new Google+ button code in sharebtn.php (also included the Google+ Javascript code in footer.php).
 6. Changed tweet button JavaScript code to footer.php.
 7. Fixed bug showing not all post format icons in search results.
 8. Optimized focus styles for forms (see style.css line 1081 and line 1759)
 9. Included FitVids 1.0 JavaScript for elastic, embedded videos (see functions.php line 55, custom.js line 47 and jquery.fitvids.js in „js“).
 10. Added Soundcloud, Pinterest and a target="_blank" option to Social Links Widgets. Also replaced RSS and RSS comments to show up at last icons.
 11. Included list-styles for standard text widget (see style.css 1315)
 12. Optimized the rtl.css for RTL language support
-

Version 1.0.3 - 6th August 2011

1. Bugfix in editor-style.css to show bold and italic text styles.
 2. Bugfix for WordPress image gallery in IE8 (added width:100% for #content .gallery in style.css in line 839)
 3. Bugfixes for Bugis Shortcodes: Updated style.css line 1060-1177 and functions.php line 244-366. Now the link="..." for the button shortcodes work and the multicolumns don't break if many columns are added on one page.
 4. Enabled blockquote styles for pages: changed #content .post blockquote p to #content blockquote p (style.css line 597)
 5. Added spacing for multiple blockquotes.
 6. Included custom.js and plusone.js into head (instead of footer), due to possible problems with other WordPress plugins.
 7. Added #__plusone_0 in style.css to fix the Google+ button position.
 8. Added 500px.com icon to the Social Links Widget.
-

Version 1.0.2 - 15th July 2011

1. Included the search page navigation (older/newer posts) in search.php line 19 to 25
 2. Added RSS Feed and RSS for Comments icon to the Social Links Widget
 3. included print.css for a print friendly version of the site contents
 4. included editor-style.css and editor-style-rtl.css for styles in TinyMCE editor
 5. simplyfied the code in content-single.php (line 11-15) to get the posts post-format icon
 6. included the template-file sharebtn.php and simplified the code in the content-....php files with a get_template_part function
-

Version 1.0.1 - 8th July 2011

1. removed width 72% in style.css on #main-nav to allow longer blog titles
 2. fixed comment navigation styles
 - Update of jQuery to version 1.6.2 in functions.php
 - changed jQuery SmoothScroll in custom.js to jquery-smooth-scroll plugin (<https://github.com/kswedberg/jquery-smooth-scroll>)
